Characterization of Reach # 10

1. (CRITH) Critical Habitat? Present
2. (SHP) Shape attractive for high speed boat use? High
3. (SHW3) How much shallowness in high speed area (0-3 Ft)? Medium
4. (SHW6) How much shallowness in high speed area (0-6 Ft)? High
5. (SGHS) How much seagrass in this high speed boat area? Low
6. (SGSH) Is there seagrass between shoreline and open area/channel? High
7. (STRY) What potential that boats stray from the channel into grass? Medium
8. (DD) Dock Density? High
9. (BD) Doating density (how many boats travel to/thru this reach?) Very high
10. (AGG) Potential for traffic pattern to cross aggregation area? None
11. (MAADJ) Howw close is reach to an aggregration area? Very High
12. (SPZP) Is speed zone present? Present
13. (MOR) What are the last ten years of watercraft mortality? 30
14. (MGRP) Wat is relative grouping of watercraft mortality? High
