Longitude:	81 d	17 m	13 s	West	
Phase	Start Date	End Date	Range Completion		
Total Property Acreage: 2111.5					
Range/Project Description:					
<p>Between 1943 and 1945, the United States acquired from various owners, by condemnation and lease, a total of 2111.5 acres in leasehold for the Orlando AAF Toxic Gas and Decontamination Yard. A portion of the site in real estate tract 51 was improved with a roadway, ordnance storage igloos, and several buildings. A small arms firing range was also constructed in this tract.</p> <p>In December of 1946, the site was determined excess to the needs of the Army Air Force. Between 1946 and 1947, the entire site was disposed of by lease terminations. The terms and conditions of the leases and termination notices, including whether any restoration was required are unknown as copies of these instruments could not be located and disposal information was obtained from the real estate maps and real property management and disposal report.</p> <p>The entire site is being utilized as an urban residential area with all of the normal appurtenant facilities, such as shopping areas, churches, schools, parks, and open areas. The portion used for the gas yard structures has been developed into a single family dwelling subdivision.</p> <p>This site was researched for chemical warfare material only and will be further investigated for additional potential OE during FY2001 and FY2002.</p>
