

FACT SHEET
Inspection of Completed Works Florida (O&M)
 Operations & Maintenance

Congressional Districts: 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27

1. DESCRIPTION

The Inspection of Completed Works (ICW) program includes the inspection of federal flood control projects which have non-federal sponsors responsible for operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) or as otherwise specified in Project Cooperation Agreements (PCA), Local Cooperation Agreements (LCA), and other agreements based on Section 221 of the Flood Control Act of 1970 (PL) 91-611) or other legislation. The primary purposes of these inspections are to prevent loss of life and catastrophic damages; preserve the value of the Federal investment; and to encourage non-federal sponsors to bear responsibility for their own protection. This program is to assure sponsor compliance with existing agreements that the structures and facilities constructed by the United States for flood protection will be continuously maintained in such a manner and operated at such times and for such periods as may be necessary to obtain the maximum benefits. District program includes above listed Congressional Districts.

2. FUNDING

Allocation for FY17	\$1,272,000
President's Budget FY17	TBD

3. SPONSORS

St. John's Water Management District
 P.O. Box 1429
 Palatka, Florida 32178-1429

Southwest Florida Water Management District
 2379 Broad Street
 Brooksville, Florida 34604-6899

South Florida Water Management District
 P.O. Box V
 West Palm Beach, Florida 33402

4. STATUS

The O&M funding allocated in FY17 will be expended to inspect federally authorized/constructed flood risk reduction projects that are operated and maintained by a non-Federal sponsor to comply with Federal regulations and policies for flood control project. Funds will be expended to conduct coordinated inspections on the most critical aspects of the system which contains 1100 miles of levees and 300 structures within Florida, Puerto Rico and the US Virgin Islands. The O&M portfolio and the Dam and Levee Safety Programs have increased the Sponsor's superintendent responsibilities to ensure safety for their respective constituents. As a result funding has increased in recent years, however, despite efficient business practices, the FY17 funding is inadequate to support the all of the District's project portfolio and mission requirement to comply with all of HQ direction on dam and levee inspections.

FY 2018 funding to be determined (TBD).
