

FACT SHEET

Intracoastal Waterway - Jacksonville to Miami, FL (O&M)

Operations & Maintenance

Congressional Districts: 3, 4, 5, 6, 7, 8, 17,18, 20, 21, 22, 23, 27

1. DESCRIPTION

The Intracoastal Waterway (IWW) project authorizes a channel 12 feet deep by 125 feet wide from Jacksonville, Florida south to Fort Pierce, Florida, and a channel 10 feet deep by 125 feet wide from Ft. Pierce, Florida south to Miami, Florida. The length of project is approximately 349 miles running from the St. Johns River in northeast Florida southward along the east coast to Miami, Florida.

2. FUNDING

Allocation for FY17	\$8,530,000
President's Budget FY18	TBD

3. SPONSOR

Florida Inland Navigation District (FIND)
 Mr. Mark Crosley, Executive Director
 561-627-3386
 1314 Marcinski Road
 Jupiter, Florida 33477-9427

4. STATUS

A Memorandum of Agreement with the Florida Inland Navigation District (FIND) to contribute funds for the Operation and Maintenance (O&M) of both the IWW and Atlantic Intracoastal Waterway (AIWW) was executed on 3 September 1997. Since that date, FIND has provided over \$50,000,000 for the O&M of the IWW and AIWW.

A construction contract was awarded for DMMA O-7, located in Martin County, Florida in November 2016 and will be complete in July 2018. Funding for the plans and specifications is from Federal funding and construction of the DMMA was from Contributed Funds from FIND and the contract is managed by the Corps. In addition, the dredging for the IWW in the vicinity of the St. Augustine Inlet and Matanzas Inlet will commence in March 2017 and is funded with Contributed funds by FIND. Design is underway for IWW dredging for Broward Reach 1 and DMMA O-23. Supplemental funding was approved to dredge the Okeechobee Waterway (OWW)/IWW intersection, named Crossroads, along with the IWW in the vicinity of the Bakers Haulover Inlet and the IWW in Volusia County. Work for all three projects is scheduled to commence in 2017.
