

FACT SHEET
C&SF Upper St. Johns River Basin
 Construction (C)
 Congressional Districts: 5, 6, 7, 8, 9, 10, 17, 18

1. DESCRIPTION

The Upper St. Johns River Basin extends approximately over 2,000 square miles, bounded by the Atlantic Coastal Ridge to the east and the Kissimmee River Basin to the west. The St. Johns River flows from its Upper headwaters near Vero Beach 310 miles north to Jacksonville and into the Atlantic Ocean. The entire river basin includes parts of eight Florida counties. The Upper Basin project area is focused in Okeechobee, Brevard, Indian River, & Osceola Counties. This project's system of canals, levees, and water control structures are designed and operated to provide flood damage reduction, recreational benefits improve and restore the environmental health and function of the basin's watershed through the use of water management and water conservation areas; and to enhance fish and wildlife habitat through the re-establishment of marshes.

2. FUNDING

Estimated Total Cost	\$227,700,000
Estimated Federal Cost	125,944,000
Allocation thru FY13	526,491
Carry In for FY14	44,862
Allocation for FY14	3,115,773
President's Budget FY15	0

3. SPONSOR

St. Johns River Water Management District
 P.O. Box 1429
 Palatka, Florida 32178-1429

4. STATUS

The project is 99% complete with 26 of 27 construction contracts awarded. The Three Forks Marsh Construction Contract was modified to terminate a component of work due to Cultural Resource issues; this will require mitigation prior to completing construction which is scheduled for FY 2014. With completion of the Three Forks Marsh Conservation Area, the Upper Basin Project construction phase will be completed. Other projects close out activities such as cultural resources mitigation, the Western Boundary Model, Water Control Plan, Operational Land Certification, O&M Manual, deficiencies assessment and repairs report are currently underway. Project Close Out and Transfer are scheduled to start in FY 2015.
