

August 1, 2011

Dear Applicant,

A copy of the Self Certification which you received from the Florida Department of Environmental Protection (DEP) for a single-family docking facility has been received by the U.S. Army Corps of Engineers (Corps). Please note that while you have received confirmation of your exemption from the DEP, prior to the initiation of any work, you may require a Department of the Army (DA) permit from the Corps for your project. If you have already obtained a DA permit for your project, please disregard this email and its contents.

We are currently unable to retrieve copies of applications which have been filed electronically. Therefore, we ask that you print out a hard copy of the attached Application Form, fill it out completely, and mail it to the Corps Field Office which has responsibility for permitting in the county in which you propose to construct your project. (See below)

You are cautioned that work performed below the mean high waterline or ordinary high waterline in waters of the United States, or the discharge of dredged or fill material into adjacent wetlands, without a Department of the Army permit could subject you to enforcement action. Receipt of a permit from the Florida Department of Environmental Protection or a Water Management District does not obviate the requirement for obtaining a Department of the Army permit for the work described above prior to commencing work.

Thank you for your cooperation.
