Dale Beter

I am writing to you about the Phipps Ocean Park Restoration Project City of Palm Beach in Palm Beach County Florida. The number is # 200000380(ip-dep)

Please do what is necessary to protect the Horseshoe reef area as it is a common dive when people come from all over the country for a dive vacation in the Palm Beach / Singer Island area. I have been diving this area for over a decade and enjoy every dive I make here. Proposing and carrying out any kind of dredging/beach reclamation program should have as its objective to protect the reef and thereby protect the local economy.

I have been diving in many areas of the Caribbean and the reef at Palm Beach/Singer Island is right up there with many of the other sites I have seen. Any program that will result in damage to the reef and the creatures that live there will take decades to recover. Along with this goes the economy which not only includes the many dive operators, but also restaurants, hotels, airlines, etc., which are supported by the diving public coming to this wonderful area to see the reefs and refresh their spirits.

Thanks for reading.

C. Robert Humphreys, DC  
124 Shore Court, #301  
North Palm Beach, FL 33408
