### OKEECHOBEE WATERWAY ROUTE 2 CULVERT CONSTRUCTION RESTRICTING NAVIGATION

#### REFERENCE:

- a. 33 CFR Navigation and Navigable Waters
- b. NTN2015-008 OWW Route 2, Culvert Replacement

#### 1. Notice to Navigation

Notice is given that the U.S. Army Corps of Engineers has multiple contracted companies in the process of replacing culverts along Route 2 of the Okeechobee Waterway from Port Mayaca to Moore Haven as part of the Herbert Hoover Dike Rehabilitation Project. Construction consists of steel and earthen cofferdams on the lakeside and landside of the dike to create a self-contained work area. The waterway will be obstructed during installation and removal of the cofferdams and during the process of replacing culverts. Recreational and commercial boaters are asked to use caution when navigating through these sections of waterway. Buoys, lights and reflectorized hazard signs will be placed at each cofferdam to delineate its location and assist boaters through the work zone. Once culvert replacements are complete, the cofferdams will be removed and waterway restored. Construction will occur 5 to 6 days a week with the possibility of night time work. The projects are anticipated to be completed in 2019. Point of contact is Gary Hipkins at 863-983-8101.
