Permit Modification No. 0216012-022-JN
Permit No. 0216012-007-JC, Palm Beach County
Palm Beach Harbor Maintenance Dredging

Dear Mr. Miller:

Your request to modify Permit No. 0216012-007-JC was received on July 24, 2015, and has been reviewed by Florida Department of Environmental Protection (Department) staff. The proposed permit modification is to update permit drawings that depict a wider berm template.

Background

The first maintenance dredging permit for Palm Beach Harbor was Wetland Resource Permit No. **50-214136-9**, issued in 1993. On September 21, 2004, the Department issued an emergency JCP, Joint Coastal Permit No. **0216012-002-JC**, to dredge only the main portion of the channel which shoaled with sand from the hurricanes of 2004. On March 17, 2005, the Department issued Joint Coastal Permit No. **0216012-001-JC**, for a one-time dredging event for the entire Palm Beach Harbor inlet and interior complex. On September 21, 2006, the Department issued Joint Coastal Permit No. **0216012-007-JC** to the United States Army Corps of Engineers (Corps). That was a major modification of Permit No. 0216012-001-JC, which authorized maintenance dredging of the entire navigation-related complex at Palm Beach Harbor/Lake Worth Inlet, and superseded the previous permit and its associated modifications. Placement of dredged material was authorized within the beach template, including both the dry beach and the

Permit Modification No.0216012-022-JN
Palm Beach Harbor Maintenance Dredging Project
Page 2 of 8

nearshore portion of the beach landward of the -17-foot mean low water (MLW) contour. The berm has an elevation of approximately +8.7 feet (MLW), with a 1:20 (vertical:horizontal) seaward slope. The beach placement site begins immediately south of the south jetty, and proceeds in a southerly direction. Within the entrance channel (between Stations 25.0 to 56.0), the Permittee was allowed to transfer shoals of less than 5,000 cubic yards to deeper parts of the channel in order to temporarily alleviate navigational hazards. Permit No. 0216012-007-JC also authorized the placement of beach-quality sand within the Mid-Town template if, during a single dredging event, the beach template immediately south of the Lake Worth Inlet becomes filled. Construction of an artificial reef was required just offshore of R-105, at a depth of approximately 22 feet, to offset the burial of the patch hardbottom reef (approximately 0.12 acre) that was expected to occur at the nearshore placement site, between Department monuments R-78 and R-79.

For additional background, please see the *Consolidated Notice Of Intent To Issue Joint Coastal Permit Authorization To Use Sovereign Submerged Lands* for Permit No. 0216012-007-JC at the following website:

[ftp://ftp.dep.state.fl.us/pub/ENV-PRMT/palm_bch/issued/216012_Palm_Beach_Harbor/007-JC/Intent_to_issue/Notice%20of%20Intent%20\(07-28-06\).pdf](ftp://ftp.dep.state.fl.us/pub/ENV-PRMT/palm_bch/issued/216012_Palm_Beach_Harbor/007-JC/Intent_to_issue/Notice%20of%20Intent%20(07-28-06).pdf)

On September 14, 2006, prior to the issuance of Permit No. 0216012-007-JC, the Department issued a modification to Joint Coastal Permit No. 0216012-001-JC (Modification No. **0216012-008-EM**). That minor modification authorized emergency dredging of a hurricane-induced shoal by allowing the use of mechanical dredges (e.g., backhoe or clamshell equipment). Emergency dredging of the hurricane-induced shoal began September 22, 2006, and was completed on November 14, 2006. The activities authorized in Permit No. 0216012-001-JC (as modified) were incorporated into Permit No. 0216012-007-JC.

On June 8, 2007, the Department issued a de minimus exemption for the rehabilitation of the south jetty (File No. **0216012-009-EE**). The jetty rehabilitation was not conducted within one year of exemption issuance, and the de minimis exemption expired. The Department issued a second de minimus exemption for the rehabilitation work on December 9, 2008 (File No. **0216012-012-BE**). Demobilization of the construction equipment could not be completed by the beginning of turtle nesting season on March 1, 2009. Therefore, in consultation with the Florida Fish and Wildlife Conservation Commission (FWC), the Department issued Field Permit No. **PB-8024269** under the Coastal Construction Control Line Program on March 11, 2009, authorizing the clean-up operations and removal of equipment from the beach.

On February 8, 2008, the Department issued Permit Modification No. **0216012-010-EM**. Joint Coastal Permit No. 0216012-007-JC inadvertently included manatee protection language that prohibited all in-water work at night. The modification clarified that although nighttime dredging using mechanical dredges was prohibited, other in-water activities were allowed if the Corps utilized extra caution and limited in-water activities at night to the maximum extent practicable.

The second maintenance dredging event under Permit Modification No. 0216012-007-JC began on April 4, 2008. The Contractor's delay in commencement, and a Town of Palm Beach restriction on work during evening and weekend hours, prevented the completion of beach placement operations by May 1, the beginning of marine turtle nesting season. On April 29, 2008, the Department issued Permit Modification No. **0216012-011-JN** to allow beach placement operations to continue into turtle nesting season by two weeks, through May 15. This modification was only in effect for the spring 2008 event.

On May 29, 2009, the Department issued Permit Modification No. **0216012-013-JN** to allow a one-time increase in the sand volume authorized for redistribution within the channel from 5,000 cubic yards to 15,000 cubic yards. The modification was requested to remove a shoal within the Lake Worth Inlet, between approximately Stations 43+00 and 47+00, which was preventing larger ships from entering Palm Beach Harbor. Routine maintenance dredging was planned for later in the summer of 2009, but action had to be taken immediately to restore design depths until the routine maintenance could occur. The Corps used their hopper dredge, the McFarland, to relocate the necessary material to deeper portions of the outer entrance channel, between Stations 0+00 and 20+00.

On October 22, 2009, a minor modification was requested to delete the pre-construction requirement for submittal of a vessel operations plan (VOP) or replace it with a more detailed list of information that would be required (File No. **216012-014-JN**). The Corps withdrew the request on May 14, 2010; however, the Department sent a letter on May 26, 2010, to clarify the information that the Department expects to receive as part of the VOP and/or the final Plans and Specifications for each event, in accordance with Specific Condition No. 4 of the permit.

On September 10, 2010, the Department issued Permit Modification No. **0216012-015-JN** to the Corps to remove the restriction on bed-leveling, adjust nighttime sea turtle nesting conditions and beach lighting conditions.

On January 31, 2012, the Department issued Permit Modification **0216012-016-JN** to allow an additional 2 feet of advanced maintenance dredging in the main entrance channel, from Sta. 30+00 to Sta. 47+00, for a total maximum depth of -41 feet MLLW (i.e., design depth of -37 feet MLLW, 2 feet of allowable overdredge, plus 2 feet of advanced maintenance). The modification also authorized the expanded settling basin to be enlarged by 50 feet to the west and 500 feet to the north. The basin would be dredged to a depth of -37 feet MLLW (i.e., design depth of -35 feet MLLW, plus 2 feet of allowable overdredge).

On September 27, 2013, the Department issued Permit Modification No. **0216012-017-JN** to require the continuation of rock removal efforts in the Town of Palm Beach following the unintentional placement of non-compliant material during the 2013 maintenance dredging event. Visual inspections for rock, and remediation through removal of observed rock, are required to

Notice of Permit Modification
Permit Modification No.0216012-022-JN
Palm Beach Harbor Maintenance Dredging Project
Page 4 of 8

be conducted quarterly or following a storm event along the length of the beach fill area used in the 2013 maintenance event.

On September 17, 2013, the Corps applied for a permit to expand the channels and basins associated with Palm Beach Harbor. Many of the design details were unavailable at that time, so the application for a construction permit was converted to an application for a conceptual permit. However, the statute for Port Conceptual Permits required any associated proprietary authorizations to be approved by the Board of Trustees of the Internal Improvement Trust Fund. So, instead, the application was split into 2 applications: File No. **0216012-019-EC** was for the conceptual approval of the expansion of the navigation channels and turning basin, which did not require proprietary authorization; and File No. **0216012-018-JC** was for the construction of an expanded settling basin, a sheetpile extension of the north jetty and the beach/nearshore sand placement sites. The Corps later withdrew the applications for both the Joint Coastal Permit (File No. 0216012-018-JC) and the Conceptual Approval Environmental Resource Permit (File No. 0216012-019-EC) on June 17, 2014.

On July 3, 2014, the Department issued a Statutory Time Extension (File No. **0216012-020-JN**) to the Corps to extend the expiration date of Permit No. 0216012-007-JC by an additional two years. The new expiration date is March 17, 2017.

On August 14, 2014, the Department issued Permit Modification No. **0216012-021-JN**, to reduce the number of rock removal and remediation inspections required by Permit Modification No. 0216012-017-JN. The frequency was reduced from four (4) to two (2) inspections annually. The modification also authorized remediation (hand removal) to be simultaneous with each inspection.

Justification

The authorized fill template described within the project description will not be changed. Under Joint Coastal Permit No. 0216012-007-JC, the toe of fill shall not extend beyond the -17 foot MLW contour, as depicted in the permit drawings. All impacts to nearshore hardbottom within this contour have been previously mitigated. Previous fill placements, prior to the sediment settling basin expansion, contained less material than what is predicted in future events. The updated drawings depict a placement with a wider beach berm but with the same slopes approved by Joint Coastal Permit No. 0216012-007-JC.

Staff Assessment

Department staff have determined that the proposed fill placement template is within the -17 foot MLW contour required by Joint Coastal Permit No. 0216012-007-JC. It should also be noted that approval for the increased berm width will be for the fall 2015, spring 2016 event only (one-time). The Department anticipates a modification request from the Corps to extend the fill template further south for future events. This southern extension would increase the benefit to

Notice of Permit Modification
Permit Modification No.0216012-022-JN
Palm Beach Harbor Maintenance Dredging Project
Page 5 of 8

the downdrift beaches while affording available beach template area to place the additional volumes of sand as a result of the recent sediment settling basin expansion.

The set of approved permit drawings shall be revised as follows:

Sheets C-07 and C-02 shall be added to the set of approved drawings attached to Joint Coastal Permit No. 0216012-007-JC, for the 2015-16 event only.

After thorough review of your application, staff finds that the proposed modification is not expected to adversely affect water quality or be contrary to the public interest. Staff has also determined that the proposed alteration does not increase the potential for adverse impact on the coastal system, public beach access seaward of the mean high water line or nesting sea turtles and hatchlings and their habitat, and that the proposed alteration does not reduce the design adequacy of the project. Since the proposed modification is not expected to result in any adverse environmental impacts not previously mitigated or water quality degradation, the **permit is hereby modified** as stated above. By copy of this letter and the attached drawings, we are notifying all necessary parties of the modification.

This letter of approval does not alter the **March 17, 2017**, expiration date or the Specific Conditions of the permit. This letter and the attached drawings must be attached to the original permit.

This permit is hereby modified unless a sufficient petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), as provided below. The procedures for petitioning for a hearing are set forth below. Mediation under Section 120.573, F.S., is not available for this proceeding.

NOTICE OF RIGHTS

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received by the clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000.

Because the administrative hearing process is designed to redetermine final agency action on the application, the filing of a petition for an administrative hearing may result in further modification of the permit or even a denial of the application. If a sufficient petition for an administrative hearing or request for an extension of time to file a petition is timely filed, this permit modification automatically becomes only proposed agency action on the application subject to the result of the administrative review process. Accordingly, the applicant is advised not to commence construction or other activities under this permit modification until the

Notice of Permit Modification
Permit Modification No.0216012-022-JN
Palm Beach Harbor Maintenance Dredging Project
Page 6 of 8

deadlines noted below for filing a petition for an administrative hearing or request for an extension of time has expired.

Under Rule 62-110.106(4), Florida Administrative Code (F.A.C.), a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, before the applicable deadline. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon. If a request is filed late, the Department may still grant it upon a motion by the requesting party showing that the failure to file a request for an extension of time before the deadline was the result of excusable neglect.

In the event that a timely and sufficient petition for an administrative hearing is filed, other persons whose substantial interests will be affected by the outcome of the administrative process have the right to petition to intervene in the proceeding. Any intervention will be only at the discretion of the presiding judge upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the applicant must be filed within 14 days of receipt of this written notice. Petitions filed by any persons other than the applicant, and other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of the notice or within 14 days of receipt of the written notice, whichever occurs first.

Under Section 120.60(3), F.S., however, any person who has asked the Department for notice of agency action may file a petition within 14 days of receipt of such notice, regardless of the date of publication.

The petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition for an administrative hearing within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S.

In accordance with Rule 28-106.201, F.A.C., a petition that disputes the material facts on which the Department's action is based must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address, and telephone number of the petitioner; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an

Notice of Permit Modification
Permit Modification No.0216012-022-JN
Palm Beach Harbor Maintenance Dredging Project
Page 7 of 8

- explanation of how the petitioner's substantial interests are or will be affected by the agency determination;
- (c) A statement of when and how the petitioner received notice of the agency decision;
 - (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
 - (e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
 - (f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
 - (g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts on which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C. Under Sections 120.569(2)(c) and (d), F.S., a petition for administrative hearing must be dismissed by the agency if the petition does not substantially comply with the above requirements or is untimely filed.

This action is final and effective on the date filed with the Clerk of the Department unless a petition is filed in accordance with the above. Upon the timely filing of a petition this order will not be effective until further order of the Department.

This permit modification constitutes an order of the Department. The applicant has the right to seek judicial review of the order under Section 120.68, F.S., by the filing of a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Clerk of the Department in the Office of General Counsel, 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000; and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days from the date when the final order is filed with the Clerk of the Department.

When there has been no publication of notice of agency action or notice of proposed agency action as prescribed in Rule 62-110.106, F.A.C., a person may request a copy of the agency action. The Department shall upon receipt of such a request, if agency action has occurred, promptly provide the person with notice. The Department does not require notice of this agency action to be published. However, the applicant may elect to publish notice as prescribed in Rule 62-110.106, F.A.C., which constitutes notice to the public and establishes a time period for submittal of any petition.
