Jacksonville District Navigable Waters Lists

In Florida, Puerto Rico, and the U.S. Virgin Islands, the U.S. Army Corps of Engineers, Jacksonville District, exercises section 10 (of the Rivers and Harbors Act of 1899) regulatory jurisdiction over the Atlantic Ocean, Gulf of Mexico, and Caribbean Sea. Additionally, all or portions of tributaries to the above waters may also be subject to section 10 authority. However, complete lists of all rivers, streams, creeks, ponds, and lakes subject to Corps section 10 authority are not available. Below are lists of waters over which the Jacksonville District currently exercises regulatory jurisdiction under the authority of both section 10 of the Rivers and Harbors Act of 1899 and section 404 of the Clean Water Act on all or a portion of the listed water. The absence of a water on these lists does not mean it or a portion of it is not a navigable water. Likewise, the inclusion of a water on these lists is not meant to imply that the water is subject to section 10 authority in its entirety. All waters subject to the ebb and flow of the tide (tidal action) are navigable waters of the US, and many of the waters listed below have some portion that is subject to the ebb and flow of the tide. Inquiries concerning Department of the Army Permit requirements on these and other tributary streams and lakes not listed below should be submitted on a case-by-case basis to the Regulatory Division, Jacksonville District.

The section 10 waters lists (below) from the Jacksonville District were compiled from multiple approved and draft navigability studies conducted during the 1970s and 1980s, and from local knowledge of tidally influenced waters. The District makes no claim that these lists are complete or completely accurate. These lists are for regulatory reference purposes only. They are not a substitute for a jurisdictional determination (JD). It is imperative that you contact the appropriate Regulatory Permit Section for a determination on whether the Corps is able to ascertain if a particular project falls within or outside of section 10 authority.
